

#### A1 Frames:

##### **A1 (approx)**

A1 Frame has a "Width" of = W600mm

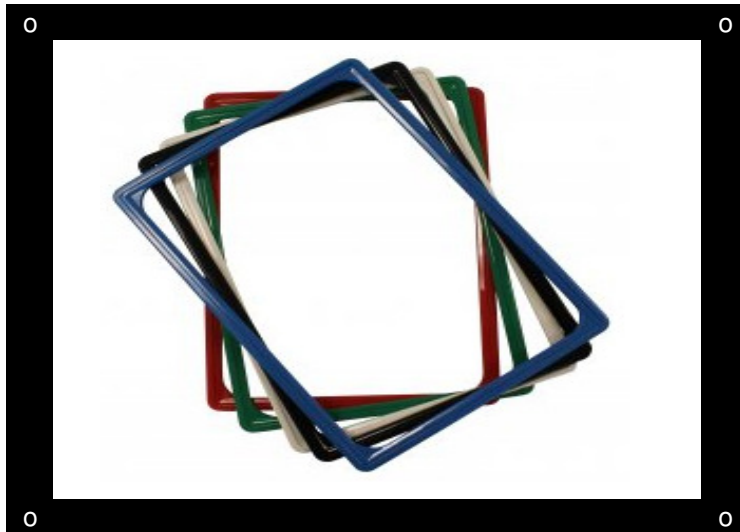

A1 Frame has a "Height" of = H845mm

A1 Frame has a \*Opening of = W590mm x D5mm

\*Opening - this is featured at the top of the frame

\*Opening this is the area you slide in your posters

Designed to add documents in A1 - and - Double-sided  
A1 Document W594 x H841mm

#### A2 Frames:

##### **A2 (approx)**

A2 Frame has a "Width" of = W427mm

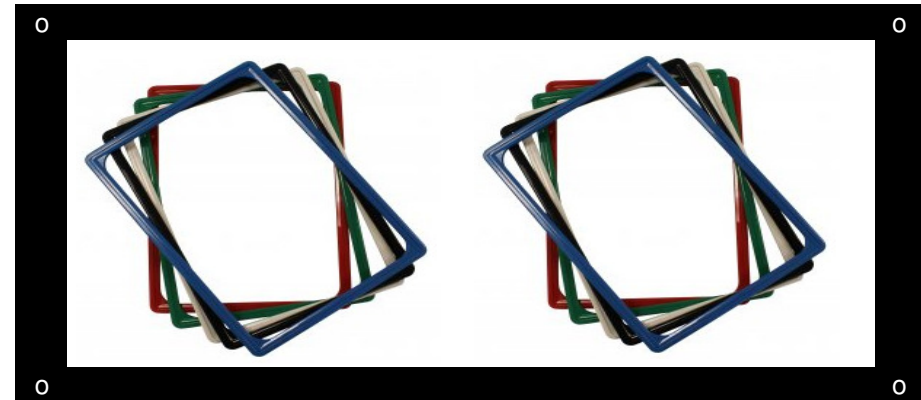

A2 Frame has a "Height" of = H614mm

A2 Frame has a \*Opening of = W420mm x D5mm

\*Opening - this is featured at the top of the frame

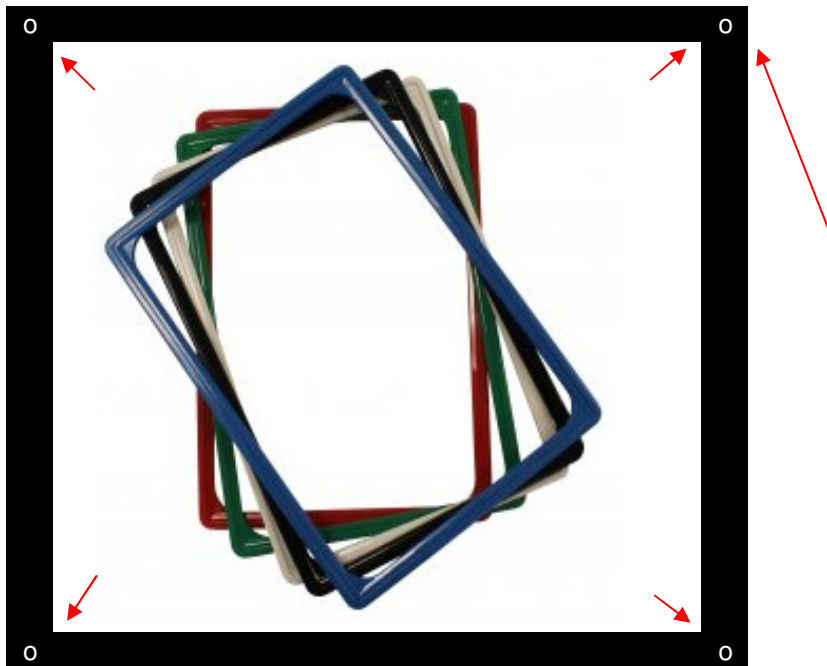

\*Opening this is the area you slide in your posters

Designed to add documents in A2 - and - Double-sided  
A2 Document W420 x H594mm

1. Frame constructed from Steel, with pre-drilled holes
2. Powder Coated in Black
3. Other Colours are possible, upon request

## Assembly Steps

### Step 1 - The Frame

Decide where your frame needs to be attached to the wall  
 Now with help of an assistant, hold the frame to the wall  
 Now using a spirit level, level the frame  
 Now mark the wall through the 4x pre-drilled frame holes  
 Once marked, remove the frame  
 Now drill wall + add raw plug + add screws

### Step 2 - The Poster Grippers

Each Poster Holder requires 2x Poster Grippers - see Step 2 Image  
 Add these to the top and bottom of each Poster Holder  
 When adding, make sure the holder gap is facing upright

### Step 3 - The U-Pockets

(If you have purchased the U-Pockets)  
 Sandwich 2x posters within the U-Pocket - add to Holder - See Step 3 Image  
 Now you should have 1x U-pocket with 2x Posters with 2x Grippers

### Step 4 - Adding the Holders to the Frame

You will need a 'Phillips Screw Driver'

#### (Starting at the bottom)

Lower the bottom gripper so, the metal section is protruding over the holder  
 Now tighten this, using the 'Phillips' - do not over tighten!  
 Now insert into your first frame hole

#### (Now the top)

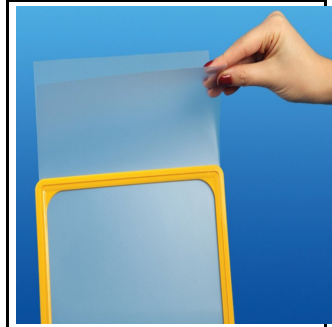

Present the holder to the top of the frame, calculate the gap  
 Now loosen the top gripper, then insert in to the top frame hole  
 Now tighten this, using the 'Phillips' - do not over tighten!  
 Repeat Step 4 actions for all remaining / supplied Poster Holders

### Step 2 - The Poster Holders

### Step 3 - The U-Pockets

# FLIP FILE DISPLAYS

## Wall Mounted - Poster A1 & A2 Flip Display

### A2 Frames:

#### A2 (approx)

A2 Frame has a "Width" of = W427mm

A2 Frame has a "Height" of = H614mm

A2 Frame has a \*Opening of = W420mm x D5mm

\*Opening - this is featured at the top of the frame

\*Opening this is the area you slide in your posters

Designed to add documents in A2 - and - Double-sided  
A2 Document W420 x H594mm

### A1 Frames:

#### A1 (approx)

A1 Frame has a "Width" of = W600mm

A1 Frame has a "Height" of = H845mm

A1 Frame has a \*Opening of = W590mm x D5mm

\*Opening - this is featured at the top of the frame

\*Opening this is the area you slide in your posters

Designed to add documents in A1 - and - Double-sided  
A1 Document W594 x H841mm

### Top Tip 1

Black is the most popular choice!

#### Why is this?

As it's a dark colour - It helps Highlight the Actual Poster!

As it's a dark colour - It proves perfect for a non-office environment!

As it's a dark colour - It proves easy to keep clean than lighter colours - finger prints etc!

### Top Tip 2

Grey / Silver is also a popular choice!

#### Why is this?

Grey / Silver - Creates a very Polished, Prestige, Professional finish!

Yes it does cost more but, the end result justifies the additional expense!
